Cloud Utilization Survey in Angola

Thursday, 19 November 2020 13:10 (30 minutes)

The following is the result of a survey designed to take a first glance into the cloud utilization patterns in the productive environment in Angola. A Survey was created and distributed amongst the active members with the aim to understand the prevalence of Cloud services, the types of solutions and scope of Cloud providers in the Angolan Market. Insights regarding market share, IaaS over PaaS or SaaS and other important aspects in the implementation and adoption of Cloud Services in Angola.
